

Swagger Petstore

1. Add a pet - method POST

The screenshot displays the Fiddler Everywhere interface with the 'Live Traffic' tab active. A list of captured requests is shown in the center pane, with the third request (ID 2203) selected. This request is a POST to 'https://petstore.swagger.io/v2/pet' with a status code of 200. Two red arrows point from the 'URL' and 'Status Code' columns of this row to the 'Request Details' pane on the right. The 'Request Details' pane shows the following information:

Request Details	
Url	petstore.swagger.io/v2/pet
Method	POST
Client IP	127.0.0.1
Remote IP	3.214.32.194
Protocol	https
SSL Version	TLS 1.2
Sizes	
Headers	690 bytes
Body	268 bytes
Total	958 bytes
Times	
Client Connected	1/2/2023 4:31:33.787 PM
Server Connected	1/2/2023 4:31:34.008 PM

Additional details visible in the right pane include 'Timings (646 ms)' with a request of 519 ms and response of 127 ms, and 'Sizes (1.5 kB)' with request headers of 690 B, request body of 268 B, response headers of 326 B, and response body of 220 B.

Users

1. Create a User - method POST

2. Get the user by Username - method GET

3. Logs the user into the system - method GET

The screenshot shows the Fiddler Everywhere interface. On the left, the 'Sessions' pane lists several requests. The main pane displays a list of requests with columns for #, URL, HTTP Version, and Status Code. The right pane shows the details of a selected request (ID 3529), including headers, cookies, and the response body. A red arrow points to the 'message' field in the response body, which contains the text: "Logged in user session:1672678683573".

#	URL	HTTP Version	Status Code
